
II. Section - Industrial Leadership

INDUSTRIAL LEADERSHIP

Horizon 2020 objectives in Industrial Leadership:

The goal of Industrial Leadership is to make the EU more attractive as a place to invest in research and innovation (including eco-innovation) by supporting activities, that are in line with the needs of the economic sphere. Industrial Leadership provides significant investment in to the development of key industrial technologies. By providing an adequate funding, Industrial Leadership should maximize the growth potential of European companies. In this section, innovative activities of the Small and medium enterprises (SMEs) are supported, because of their transformation into the world-class companies.
